

Now you can get the
same high level of data
security that Fortune 500
companies enjoy –
without the high price tag.

Brought to you by

THE LEADING DATA STORAGE PROVIDER
FOR TODAY'S BUSINESS OWNER

All computer hardware, discs and tapes eventually fail.

How secure is your data? Do you consistently backup?
Every day? Once a week? Once a month?
Is your backup stored offsite?
Even worse, is your backup stored onsite?
If you experience a fire, flood or theft,
is your backup really safe?

Now thanks to didubackup.com from Big G Technologies, you can ensure all your data is safe and secure with the same type of protection that only Fortune 500 companies previously enjoyed.

Automatic data backup >> Offsite data storage >>
Triple redundancy >> Military encryption technology

The primary concern of every business owner is to keep their business up and running even in the event of an emergency such as a fire, flood or theft.

Protecting the computer files and databases accumulated since the day you first opened your doors is especially vital.

didubackup?com
from Big G
Technologies
is the smart
choice.

didubackup?com automatically backs up files and stores them offsite on redundant servers in our main storage facility; another copy is stored in a different offsite location.

All files are encrypted using 256-bit military encryption technology – stronger than that used for many online banking systems -- making your files nearly impossible to decipher. Only designated personnel have the encryption code; didubackup?com personnel can never access your files.

didubackup?com can store up to 30 different versions of files.

didubackup?com allows you to revert back to any of the previous 30 versions of those same files.

You always have immediate access to stored files. Files can be restored any time, day or night.

didubackup?com is completely seamless – work can continue without interruption as files are being backed up.

Easy >> Affordable >> Modular

Data Security I

Idea with locations with less than 10 computers requiring backup; start off with 5 GB of storage space -- enough space for approximately 500,000 pages of text.

\$29.95/month for one account with one computer

\$19.95/month for each additional computer and an additional 5 GB of overall storage space

\$6.95/month for an additional 500 MB of overall storage space

\$45.00 one time only set up fee

Data Security II

Idea with locations with less than 10 computers requiring backup; start off with 10 GB of storage space -- enough space for approximately 1,000,000 pages of text.

\$59.95/month for one account with one computer

\$19.95/month for each additional computer and an additional 5 GB of overall storage space

\$6.95/month for an additional 1 GB of overall storage space

\$75.00 one time only set up fee

Data Security III

Idea with locations with 10 computers requiring backup; start off with 50 GB of storage space -- enough space for approximately 5,000,000 pages of text.

\$219.95/month for one account with one computer

\$14.95/month for each additional computer and an additional 5 GB of overall storage space

\$4.95/month for an additional 1 GB of overall storage space

\$150.00 one time only set up fee

No Contracts, no discs or drives, no software upgrades, or IT staff required
To protect computer files and databases. You can't afford not to back up with

didubackup?.com

Save time and money. Protect against data loss today.

To use didubackup.com from Big G Technologies, follow the signup link at www.didubackup.com. Our easy-to-use wizards will guide you through the signup process for your first backup.

There are no contracts to sign and there's no obligation to long service agreements. Simply choose from three plans to accommodate the amount of storage needed and pay a small monthly fee.

Since didubackup.com software is modular, you will never run out of storage space. Should you run short of space while backing up, we'll continue the backup and notify you via e-mail that you exceeded your storage space. You'll be invoiced for the additional storage space in your next billing cycle.

Without a doubt, didubackup.com from Big G Technologies, is the best way to protect against data loss – and the high cost of system upgrades.
